

REvil RANSOMWARE DECRYPTION TOOL

Steps for decryption:

Step 1: Download the decryption tool from download.bitdefender.com/am/malware_removal/BDREvilDecryptor.exe and save it somewhere on your computer

Step 2: Double-click the file and allow it to run by clicking Yes in the UAC prompt.

Step 3: Select "I Agree" for the End User License Agreement

License Agreement

Please read and confirm if you agree.

Subscription Agreement and Terms of services for Home User Solutions NOTICE TO ALL USERS: PLEASE READ THIS AGREEMENT CAREFULLY! BY OPENING THIS PACKAGE, BREAKING THE SEAL, BY SELECTING "I ACCEPT", "OK", "CONTINUE", "YES" OR BY INSTALLING OR USING THE SOFTWARE IN ANY WAY, YOU ARE INDICATING YOUR COMPLETE UNDERSTANDING AND ACCEPTANCE OF THE TERMS OF THIS AGREEMENT. If the Software is downloaded from the websites (for paid or trial use purposes), this Agreement will be accepted and a contract formed when the end user ("You") selects an "I Accept", "OK" or "Yes" button or box below prior to download or installation. The Agreement is made available on Bitdefender websites as well for your reference. Certain Bitdefender Solution may require an active and stable connection to the Internet in order to function. It is therefore your responsibility to ensure that you have at all times an active and stable Internet connection. IF YOU DO NOT AGREE TO THESE TERMS AND CONDITIONS DO NOT INSTALL OR ACCESS THE SOFTWARE OR OTHERWISE INDICATE REFUSAL, MAKE NO FURTHER USE OF THE SOFTWARE, AND CONTACT YOUR VENDOR OR CUSTOMER SERVICE, FOR INFORMATION ON HOW TO OBTAIN A REFUND OF THE MONEY YOU PAID FOR THE SOFTWARE AT ANY TIME DURING THE THIRTY (30) DAYS PERIOD

☐ I agree with the terms of use

CONTINUE

NOTE: Some versions are not yet decryptable

Step 4: Select "Scan Entire System" if you want to search for all encrypted files or just add the path to your encrypted files.

We strongly recommend that you also select "**Backup files**" before starting the decryption process. Then press "Scan".

Please enter the necessary information to start

☐ Scan entire system

☐ Backup files

Select the encrypted folder

BROWSE

Select the test folder

BROWSE

START TOOL

ADVANCED OPTIONS

Users may also check the “Overwrite existing clean files” option under “Advanced options” so the tool will overwrite possible present clean files with their decrypted equivalent.

B Bitdefender advanced options.

☐ Overwrite existing clean files

If the clean version of the encrypted file already exists, it will be overwritten

CLOSE

At the end of this step, your files should have been decrypted.

If you encounter any issues, please contact us at forensics@bitdefender.com.

If you checked the backup option, you will see both the encrypted and decrypted files. You can also find a log describing decryption process, in `%temp%\BDRemovalTool` folder:

To get rid of your left encrypted files, just search for files matching the extension and remove them bulk. We do not encourage you to do this, unless you doubled check your files can be opened safely and there is no trace of damage.

Silent execution (via cmdline)

The tool also provides the possibility of running silently, via a command line. If you need to automate the deployment of the tool inside a large network, you might want to use this feature.

- **-help** - will provide information on how to run the tool silently (this information will be written in the log file, not on console)
- **start** - this argument allows the tool to run silently (no GUI)
- **-path** - this argument specifies the path to scan
- **o0:1** - will enable **Scan entire system** option (ignoring **-path** argument)
- **o1:1** - will enable **Backup files** option
- **o2:1** - will enable **Overwrite existing files** option

Examples:

BDREvilDecryptor.exe start -path:C: -> the tool will start with no GUI and scan **C:**

BDREvilDecryptor.exe start o0:1 -> the tool will start with no GUI and scan entire system

BDREvilDecryptor.exe start o0:1 o1:1 o2:1 -> the tool will scan the entire system, backup the encrypted files and overwrite present clean files
